Summary

As a Junior full stack engineer, I work across both the front end and back end to build clean, scalable applications. My experience includes creating responsive interfaces with HTML, CSS, JavaScript, React, and TypeScript, developing server-side logic using Node.js/Express, and working with databases such as MongoDB and SQL. I also use Git/GitHub, RESTful APIs, Cursor, and cloud services like AWS to support development and deployment.

Work experience

Junior Full Stack Engineer

2025-06 - present

Luul Solutions Ltd

During my internship with LUL Solutions, I gained valuable hands-on experience applying technologies in real projects-building intuitive interfaces,

- contributing to backend features.
- collaborating within modern development workflows.
- This role strengthened my problem-solving abilities and continues to guide my growth as a full stack engineer committed to delivering reliable, user-centered solutions.
- All my projects are showcased both in my Github and my personal website.
